**Public Engagement** The concept of 'molecular machines' is familiar to the general public, giving us the opportunity to promote the excitement of cutting-edge chemistry and the general benefits of science to society. Our work has featured in more than 1200 media articles in >80 countries, and several TV programmes. I have given numerous public lectures around the world, including keynote public lectures at the British Association Festival of Science, Edinburgh International Science Festival, Cambridge Science Festival, H. Dudley Wright Colloquia in Geneva, the Bakerian Lecture of the Royal Society, and public lectures at the Institute of Creativity in Hong Kong, Blacksburg, Virginia, USA, Jerusalem and Christchurch, New Zealand. I also give talks specifically geared to young researchers, including the GDCh Christmas lectures in Düsseldorf, public lectures for the ETH 150<sup>th</sup> anniversary, the Young Danish Chemistry Society, the Young Dutch Organic Chemists Meeting, YoungChem (Poland), Berzelius day (Sweden) and at Spanish, French, US, Danish, Italian and Dutch PhD Student Conferences and Summer Schools in Tarragona, Urbana-Champaign, Bordeaux, Odense, Gargano, Eindhoven and Cagliari.

Our work on molecular knots features in the 2019 & 2022 Guinness Books of World Records. In 2018 we commissioned a popular music video [<https://bit.ly/2N240MY>] on nano-robotics [<https://bit.ly/3b51h2I>]. In 2017 we established a science prize at my alma mater that aims to encourage girls and financially disadvantaged school children to study science at university [<https://bit.ly/2yztqPh>]. In 2021 we established the 'Dawid' Female Leadership Scholarships for female PhD students in China. I am a School governor and a Director of Withington Girls' School, one of the UK's leading girls' schools.
